SUMMARY

Final-year Computer Science & Business Systems student at NMIT (graduating 2027) with hands-on experience in AI/ML and cybersecurity. Built and deployed ScamShield, an LLM-powered job scam detector using Llama 3.3 70B, FastAPI, and Supabase. Completed an Android penetration testing and Windows digital forensics internship at Threat Prism. Worked on deep learning pipelines (PyTorch, CNN-Transformer), fraud detection systems, and full-stack development. Holds certifications in Oracle Cloud Infrastructure AI, Microsoft SC-900, and Google Cloud Engineering. Documentation Lead at DataWiz NMIT; competed in HackArena 2.0 and ET AI Hackathon nationally.

EDUCATION

Nitte Meenakshi Institute of Technology (NMIT)

Sept 2023 - Aug 2027 | Bengaluru, KA

B.E. Computer Science and Business Systems | CGPA: 7.94 / 10.0

St. Michael Composite PU College

June 2021 - March 2023 | Madikeri, KA

PUC (Science - PCMC) | 95.3%

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, Scala, SQL, HTML5, CSS3

AI / ML / DL: Scikit-learn, TensorFlow, PyTorch, ANN, CNN, Random Forest, Logistic Regression, SVM

Data: NumPy, Pandas, Matplotlib, Seaborn, SciPy, NLTK, feature engineering, data preprocessing

APIs & Tools: Google Gemini API, Groq API, OpenAI API, FastAPI, Streamlit, REST APIs, JSON, pdfplumber

DevOps & Cloud: Git, GitHub, AWS EC2, Linux (Ubuntu), MySQL, Docker, GCP, Render, Netlify

Cybersecurity: Burp Suite, MobSF, Frida, JADX, Autopsy, Digital Forensics, Phishing Simulation

INTERNSHIP EXPERIENCE

Cyber Security Intern - Threat Prism (via 1Stop)

Jul 2025 - Sep 2025 | Remote

- Conducted Android application penetration testing on InsecureBankv2 targeting OWASP Mobile Top 5 vulnerabilities using Burp Suite, MobSF, JADX, and Frida; uncovered insecure data storage, cleartext HTTP, auth bypass via ADB intent spoofing, and weak AES-CBC with hardcoded keys.
- Performed digital forensic analysis of a Windows 10 disk image using Autopsy 4.18.0; identified credential-dumping tools (Mimikatz, Lazagne) and a ZeroLogon exploit archive from extracted browser artifacts, PowerShell history, and Windows Defender logs.

Green Internship (AICTE & Salesforce) - 1M1B

Jul 2025 - Aug 2025 | Remote

- Explored Design Thinking for Sustainability and Data Visualization with Tableau; built a live project - Green Habit Tracker, a digital diary for climate action and sustainable living.

PROJECTS

ScamShield - AI Job Scam Detector (Live: thescamshield.netlify.app) Python | FastAPI | Llama 3.3 70B | Supabase | EasyOCR | Netlify |

Render

- Built AI-powered job scam detector analyzing WhatsApp/Telegram messages, PDFs, DOCX files, and image screenshots using EasyOCR and few-shot prompt engineering on Llama 3.3 70B; achieved 100% precision and recall on 20-message evaluation set.
- Implemented community scam reporting with Supabase PostgreSQL (RLS enabled), live threat feed, scan history dashboard, and LLM-powered chat assistant restricted to fraud-related queries with persistent chat history.
- Deployed full-stack with rate limiting (slowapi), input validation, graceful degradation fallback, and GitHub auto-deploy to Render + Netlify.

Fraud Detection in Financial Services Python | Scikit-learn | RobustScaler | Streamlit

2025

- Developed an interactive Streamlit dashboard to benchmark Logistic Regression and Random Forest models on severely imbalanced credit card transaction data (<1% fraud rate).
- Engineered a state-managed (st.session_state) real-time inference sandbox utilizing RobustScaler preprocessing to classify custom user-input transaction profiles safely against outliers.

Hyperspectral Anomaly Detection Python | PyTorch | CNN-Transformer | XAI

2026

- Developing a multiscale CNN-Transformer pipeline for unsupervised anomaly detection in hyperspectral imagery, targeting improved spatial-spectral feature representation.
- Integrating Explainable AI (XAI/Grad-CAM) techniques; evaluating on benchmark datasets (San Diego, Pavia) using AUC-ROC metrics.

ACHIEVEMENTS

- Selected among Top 21 teams nationwide (Top 7 in Tech for Impact track) out of 600+ teams at Student Innovation & Product Summit (SIPS) 2026, IIM Bangalore.
- Shortlisted for final rounds of HackArena 2.0 and ET AI Hackathon, placing among the top 500 participants nationwide.
- Participated in multiple national-level competitions: GenAI Academy, FinTech Hackathon, and Agentic AI- organized by Hack2Skill.
- Ranked 2nd in Science Stream at St. Michael's Composite PU College, Madikeri, Coorg.

LEADERSHIP & ACTIVITIES

Documentation Lead & Core Member - DataWiz NMIT

2024 - Present

- Manage official documentation, technical reports, and event records for NMIT's data science club; promoted from Member to Core Member.
- Co-organised the Odoo x NMIT Hackathon, coordinating participant registration, logistics, and team scheduling end-to-end.
- Serve as Vice Class Representative (CR) for the CSBS batch.

CERTIFICATIONS

Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate | Google Cloud Engineering Certificate (ACE Track) | Microsoft Certified: Security, Compliance and Identity Fundamentals (SC-900) | Networking Basics & Operating Systems Basics (Cisco Networking Academy) | Infosys Springboard: Programming Using Java, HTML5, Database & SQL, NLP
